

I strongly oppose the FCC removing the New Jersey's "Do Not Call List". This list has helped reduced the large amount of telemarketing calls that I used to receive personally. The general public has been inundated with ads from all over the place whether its on billboards, magazines, newspapers, mail, e-mail, etc. I understand the 1st amendment right to advertise, but people should have the right to decide whether or not to receive calls at their personal home, not the marketers!
